PROFESSIONAL SUMMARY

Full-Stack Developer with over 3 years of experience specializing in the MERN stack, Next.js, NestJS, and Node.js. Skilled in building high-performance, scalable web applications and optimizing system performance, as demonstrated by a 35% improvement in user engagement on a key project. Proficient in developing robust RESTful and GraphQL APIs using AWS, Docker, and Prisma ORM to deliver secure and efficient solutions. Committed to advancing digital transformation through full-stack development and cloud technologies.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, SQL, HTML/CSS
- **Frontend:** React.js, Next.js, AngularJS, CMS(Content Management System), Tailwind.
- **Backend & API:** Node.js, Express, NestJS, GraphQL
- **Databases & ORM's:** MongoDB, PostgreSQL, Prisma ORM, Redis
- **DevOps & Cloud:** Docker, AWS, GitHub Actions, NGINX, CI/CD
- **Web Data Analytics Tools:** Plausible, Grafana, Google Analytics, Microsoft Clarity
- **Android & IOS:** React Native, Expo.
- **AI Agent:** n8n, Lindy.AI, GumLoop.AI
- **Tools:** Git, GitHub, Nodemailer, Project Management, Performance Testing
- **Libraries:** Chart.js, Three.js, Spline Integration, Ant Design, ShadCn UI, React Bits, LDRS, Lenz, tsParticles.

EXPERIENCE

Inbound Agency

July 2024 - Oct 2024

Full-Stack Developer

Multan, PB

- Designed and maintained RESTful APIs to ensure seamless integration between front-end and back-end systems.
- Collaborated with senior engineers to resolve 10 backend issues, increasing system stability by 30%.
- Tested and optimized 8 APIs, improving functionality by 25% and aligning with industry best practices.
- Utilized technologies such as Node.js, MongoDB, React.js, Express.js, JavaScript, and ANT Design.

Freelancer

March 2023 - Present

Full-Stack Developer

Remote

- Implemented a scalable event platform yielding a 35% increase in user satisfaction, by improving the efficiency of attendee check-in and post-event survey deployment, according to user feedback.
- Streamlined secure RESTful APIs, integrating Cloudinary for scalable media handling and Redis for session caching, which accelerated API response times by 70%.
- Utilized MERN+ stack (Node.js, Express.js, React.js, Next.js) with PostgreSQL (Prisma), MongoDB, and Vercel to architect and deploy production-ready applications—enhancing system scalability and reducing deployment time.

PROJECTS

1. Event Management System:

July 2024 – Jan 2025

- Delivered an event management platform that featured role-based dashboards for administrators, organizers, and attendees; this reduced customer support inquiries by 30% and increased user satisfaction.
- **Technologies:** Node.js, Express.js, Next.js, React.js, PostgreSQL with Prisma, Redis, Cloudinary, Stripe Payment Gateway, AES Encryption.
- **Impact:** Enhanced system efficiency and minimized manual administrative tasks by 60%, resulting in a more responsive platform and boosted user satisfaction.

[Website](#) 

2. Euphoria E-commerce Store:

April 2023 – Aug 2024

- Pioneered the development of Euphoria, a complete e-commerce solution with integrated payment gateways and real-time inventory management, leading to a 40% reduction in order processing time and amplified customer satisfaction.
- **Technologies:** React.js, Vite, Tailwind CSS, Node.js, Express.js, bcrypt, JWT, MongoDB, Vercel.
- **Impact:** Delivered a seamless online shopping experience by integrating Stripe payment gateways and automating inventory management—enhancing customer satisfaction and reducing order errors.

[GitHub](#) 

3. AI Chatbot:

Mar 2025 – April 2025

- Established an AI chatbot web application using React.js, Node.js, Express, and OpenAI APIs—delivering an intuitive, responsive conversational interface that elevated user engagement and satisfaction.
- **Technologies:** React.js, JavaScript, Node.js, Express.js, React Router OpenAI & .
- **Impact:** Refined an AI chatbot platform by integrating OpenAI APIs and implementing streamlined application management—delivering natural, human-like conversational experiences that strengthened user engagement and satisfaction.

3. Gum.AI:

July 2025 – Present

- Architected and deployed a full-stack AI assistant web app using React.js and Node.js, integrating 7+ LLMs including DeepSeek R1/V3, GPT-4o/3.5-turbo, Mistral, xAI Grok, Gemini, Groq, and Perplexity—enabling users to switch seamlessly between models for tailored outputs.
- Engineered a modular backend with OpenAI-compatible routing and unified request handling, allowing dynamic context passing, multi-model support, and rate-aware execution logic.
- Designed a multi-tab conversational UI with model-switching, prompt history, and workflow tools—boosting user efficiency across tasks like summarization, coding, research, and ideation.

EDUCATION

Muslim Public High School

Multan, PB

Matriculation. in Computer Science

Jan 2019– April 2021

Muslim Group of Schools & Colleges

Multan, PB

Intermediate. in Computer Science [ICS]

Feb 2021 – Mar 2023
